

Vabilo na predavanje patentnega zastopnika / Invitation to a lecture by a patent attorney

**Dr. Christian Heubeck – Weickmann & Weickmann**

**Četrtek / Thursday, 18.11.2021 ob / at 11:00 / on Webex**

**Potrebno se je registrirati na [povezavi](#) / Register is required via [link](#)**

Povezava za predavanje bo poslana registriranim udeležencem. / Link to lecture will be sent to registered participants.

## Patent work in practice

Patents play a very important role in today's knowledge economy. Large corporations, small businesses and startups use patents to protect their ideas and assets from being copied and to defend their competitive edge. Increasingly, universities and institutes are also making use of patents to safeguard and commercially exploit their research results, and to facilitate technology transfer to industry partners. Today's students are the engineers, researchers, and managers of tomorrow. An awareness of what intellectual property is and how it can be protected will stand these students in good stead for their future careers. For this reason, it is important they have access to information on the patent system.

The lecture is aimed at researchers who have already encountered issues and challenges in their research work and are looking for practical advice on how to go about patenting and other forms of IP protection. The lecture will be given by Dr Christian Heubeck, an experienced patent attorney who works at the renowned German patent firm Weickmann & Weickman. His expertise covers the fields of engineering and life sciences. The lecture is suited for both first-time applicants and those who have already applied for a patent and wish to deepen their knowledge.
